

## Statement: Appeal by Dr Bawa-Garba

Today's result of the appeal by Dr Bawa-Garba against the GMC's decision to strike her off means that her name will be restored to the medical register.

This case, which came about through the tragic death of a child, Jack Adcock, has been difficult on many fronts. It has, however, raised several important issues for the medical profession that have been recognised and need to be addressed. It is now time to move on to embed the lessons learnt in order to improve patient safety and therefore help prevent a similar occurrence in the future.
